Profile Summary

I aspire to gain as much experiences as I can in a real working environment as a Frontend Developer. With the communication and teamwork skills that I have, I will utilize them as a platform to create and engage a good relationship with people. I am going to take full advantage of the job and task given to me as a challenge to improve my skills and knowledge as it is an essential part of developing myself.

Work Experience

Senior Software Developer | PETRONAS **July 2025 - October 2026**

Job Scope: Full-Stack Developer

- Develop scalable and reusable application components using Next.js, following structured and maintainable coding practices.
- Design and manage MSSQL databases, including database structures, data mapping, relationships, and data processing requirements.
- Develop Node.js automation scripts and ETL pipelines for data extraction, transformation, migration, and processing of large datasets.
- Perform data analysis, cleansing, validation, transformation, and migration across Development and Production environments.
- Develop end-to-end data processing workflows from RAW → SILVER databases, including testing, debugging, and data validation.
- Integrate processed datasets with Power BI, resolving data mapping, data type, and database compatibility issues.
- Implement Azure Storage Blob-based data extraction workflows, including storage configuration, SAS token generation, and externalized data sources.
- Conduct application, database, ETL, and integration testing to identify and resolve bugs and data inconsistencies.
- Collaborate with UI/UX designers, developers, business users, technical teams, and stakeholders to translate business requirements into technical solutions.
- Support production deployment, system maintenance, troubleshooting, and data quality assurance across multiple project environments.
- Prepare technical documentation, data mapping, process flows, and task tracking materials to support development and project implementation
- Tech Stack: Next.js, Node.js, MSSQL, Azure Storage Blob, Power BI, ETL, JavaScript, Git, REST API

Software Developer | ShopOpx Sdn Bhd **Nov 2024 - July 2025**

Job Scope: Full-Stack Developer

- Designed the structure and developed scalable and reusable components using Vue.js and Quasar Framework, ensuring a well-structured and maintainable codebase for easy debugging and collaboration.
- Implemented Vuex for efficient state management, optimizing data handling and improving application performance.
- Built responsive and user-friendly interfaces with Vue.js, Quasar,and Tailwind CSS, ensuring seamless user experiences across various devices.
- Integrated RESTful APIs using Axios, enabling smooth communication between frontend and backend services.
- Collaborated with UI/UX designers and backend developers to align frontend implementation with business goals and maintain design consistency.
- Conducted rigorous testing and debugging using browser debugging tools to ensure high performance and error-free applications.
- Developed and optimized RESTful APIs with ASP.Net Core (C#) to support frontend functionality. Designed and managed MySQL database structures using MySQL Workbench, ensuring efficient data storage and retrieval.
- **Tech Stack**: Vue.js, Quasar Framework, Vuex, Tailwind CSS, Axios, ASP.NetCore (C#), MySQL

Software Developer | Consurv Technic (M) Sdn Bhd **May 2024 - Sep 2024**

Job Scope: Frontend Web Developer

- Contributed to the Petronas Digital Upstream project by maintaining and enhancing existing frontend and backend code.
- Developed and optimized responsive user interfaces using React, Next.js, and Tailwind CSS, ensuring a seamless user experience.
- Utilized ShadCN UI for consistent and modern UI components, improvingmaintainability and scalability. Integrated and managed data using Prisma ORM, ensuring efficient database interactions.
- Collaborated with backend developers, designers, and data analysts to ensure seamless integration of features and data pipelines.
- Performed debuggingand testing to enhance application performance and resolveissues across multiple devices and platforms.
- Tech Stack: React, Next.js, TailwindCSS, ShadCN UI, Prisma ORM

Software Developer | Syntronic Malaysia Sdn Bhd **Apr 2023 - Apr 2024**

Job Scope: Frontend Developer

- Outsourced to Telekom Research& Development Sdn Bhd (TM R&D), a leading researchand development organization in telecommunications and multimedia.
- Maintained and enhanced the FORCE project,improving UI and performance using Webix.js and ApexCharts. Migrated existing charts from Webix widgets to ApexCharts for better data visualization.
- Designed and structured the Angular frameworkfor FORCE - Supervisor, ensuringscalability and maintainability. Developed reusable UI components using Angular and Material UI.
- Integrated APIs and optimizedAJAX requests, ensuringseamless data flow and systemefficiency. Collaborated with backend developers for smooth integration and functionality alignment.
- Tested and debugged applications for cross-device compatibility and performance optimization.
- Tech Stack: Webix.js, ApexCharts, AJAX, Angular, MaterialUI

Analyst Programmer | GoShare Sdn Bhd **Aug 2022 - Mar 2023**

Job Scope: Web3/Blockchain/Frontend Web Developer

- Worked on Project Oasisgame based blockchain technology. A platformwhere multiple usersfrom different network such as Ethereum to join and create their own world.
- Transformed and integrated the game using React, Phaser 3 Game Engine and TypeScript, ensuring smooth gameplay and blockchain interoperability.
- Developed and structured the Web3 application using React.js, TailwindCSS, Material UI, and Flowbite, ensuring a modular and maintainable codebase with reusable components.
- Integrated blockchain wallets such as MetaMask, Web3Auth,Phantom, and Sequence,enabling seamless authentication and cross-network interactions.
- Designed and implemented a Skin Generator, allowing users to upload character skins by body parts, merge images into a single skin, and convert them into blob format using React.js.
- Collaborated with designers and backend developers to ensure seamlessUI/UX and efficientdata integration.
- Tech Stack: React.js, Tailwind CSS, Material UI, Bootstrap, Swiper.js, Flowbite, Phaser 3, React TypeScript, Web3Auth, MetaMask, Phantom Wallet

Frontend Web Developer, Internship | DigitalCultivation Sdn Bhd **Mar 2022 - Aug 2022**

Manufacturing Enterprise System(MES), Flawork Sdn Bhd

- Designed and integrated the system by using a VueJs Framework.
- Designed and built automation system for food factory which integrated IOT into manualdistribution line on certain phases.
- Improvement of 100% of Quality Assuranceprocess during the production.
- Collaborated with other developers to ensure seamlessintegration of designsand functionality.

Babble dApp

- Designed the structure and developed a Web3 chatting application using React.js and Tailwind CSS, ensuring modular and reusable components.
- Integrated MetaMaskwallet for secureand decentralized user authentication.
- Collaborated with developers to ensure smoothblockchain transactions and UI/UX consistency.

Project Oasis

- Created and integrated a blockchain game that used React, Phaser 3 game engine and Typescript. Collaborated with designers and back-end developers to ensure seamless integration of designs and functionality.
- Tech Stack: React.js, Tailwind CSS, MetaMask, Web3, Blockchain

Educational Background

Bachelor of Information Technology (Hons.) Intelligent SystemsEngineering **2020 - 2022**
Universiti Teknologi Mara (UiTM) Shah Alam
CGPA : 3.72 (Dean's List and Vice Chansellor Awards)

Diploma in ComputerScience and Mathematics **2017 - 2019**
Universiti Teknologi Mara (UiTM) Segamat
CGPA : 3.71 (Dean's List and Vice Chansellor Awards)

Relevant Projects

Software Developer | KejeHub **Jan 2025 - Aug 2025**

- Developed a modern and responsive React 18 SaaS platform with role-based access control, user/group management, company management, and dynamic navigation.
- Contributed to a business management platform supporting e-Invoice submission and integration with the LHDN API, enabling businesses to submit and manage electronic invoices digitally.
- Implemented JWT authentication, permission-based routing, and dynamic menu management using React Context API and React Router.
- Built reusable UI components, interactive data tables, forms, charts, and responsive layouts using Material UI and ApexCharts.
- Integrated REST APIs and managed application data using SWR, with reusable hooks and structured frontend architecture.
- Collaborated with developers and stakeholders to develop, test, and maintain features based on business and system requirements.
- Tech Stack: React.js, JavaScript, Vite, Material UI, React Router, Context API, SWR, ApexCharts, JWT, REST API, LHDN e-Invoice API, Git

Web Developer | Codebase Technology, Dubai, UAE **Sept 2024 - May 2025**

- Developed and maintained the company's official corporate website using WordPress, translating Figma designs into responsive, production-ready web pages.
- Built reusable layouts and components using Elementor and Elementor Pro, ensuring consistent design across the website.
- Utilized Crocoblock to create structured and dynamic content systems, allowing website content to be managed and updated efficiently.
- Selected and configured appropriate WordPress plugins based on functional and business requirements.
- Optimized website performance using NitroPack, reducing unnecessary resources and improving page loading speed and overall website performance.
- Implemented responsive layouts and optimized the website for desktop, tablet, and mobile devices.
- Performed ongoing website maintenance, content updates, plugin management, troubleshooting, and performance optimization.
- Tech Stack: WordPress, Elementor, Elementor Pro, Crocoblock, NitroPack, HTML, CSS, Figma

Software Developer | World of Meme **Jul 2024 - Aug 2024**

- Translated Figma UI/UX designs into an interactive Web3 website using React.js and Tailwind CSS, ensuring accurate design implementation and responsive layouts.
- Developed interactive components and animations to create an engaging and dynamic user experience.
- Built a modular and reusable frontend structure using React.js and Tailwind CSS to support maintainability and future enhancements.
- Integrated the frontend with a Node.js/Express.js backend and MySQL database for user data and token-related information.
- Implemented REST API integration to facilitate communication between the frontend, backend, and database.
- Researched and configured production deployment on Vercel and Railway, deploying the frontend and backend respectively and ensuring the application was properly configured for production.
- Collaborated on the implementation and refinement of features based on Figma designs and project requirements.
- Tech Stack: React.js, Tailwind CSS, JavaScript, Express.js, MySQL, REST API, Vercel, Railway, Figma

Software Developer | Consultation Appointment System **Mar 2024 - May 2024**

- Designed and structured the application using React.js and Tailwind CSS, ensuring a clean, scalable, and maintainable codebase with reusable components.
- Implemented state management using React Context,providing a more efficient and scalable alternative to third-party solutions like Redux.
- Integrated APIs using Axios,ensuring smooth data fetching and backend communication.
- Designed and developed the database using MySQL, optimizing data structure for efficient storage and retrieval.
- Built the backend using Node.js and Express.js, ensuringseamless API interactions.
- Collaborated with other developers and UI/UX designers to enhance user experience and application usability.
- Tech Stack: React.js, Tailwind CSS, React Context,Axios, Node.js, Express.js, MySQL

Frontend Developer | Trading System **Oct 2023 - Dec 2023**

- Developed, improved, and maintained a trading platform using React.js, ensuring a user-friendly and responsive experience.
- Structured the application with reusable components, optimizing maintainability and future scalability.
- Integrated Horuz Market API, ensuring seamless real-time data retrieval and trading functionality.
- Utilized React Bootstrap and Tailwind CSS to create a visually appealing and responsive UI.
- Collaborated with backend developers and UI/UX designers to enhance usability and system efficiency.
- Tech Stack: React.js, Tailwind CSS, React Bootstrap, Axios

Machine Learning Developer| Aqua Detect IOT **Aug 2022 - Jan 2023**

- Developed a deep learning model using Convolutional Neural Networks (CNN) to classify prawn types, detect gender, and measure body features.
- Preprocessed images by removing noise, converting to grayscale, and calculating distances between key body points, achieving 83% accuracy.
- Utilized Roboflow for computer vision tasks, optimizing image annotation and dataset preparation. Created a user-friendly GUI using Flask, allowingusers to upload prawn images for real-time classification and measurement.
- Integrated the trained model into the Flask application for seamless prediction and output visualization.
- Tech Stack: Python, TensorFlow/Keras, OpenCV,Flask, Roboflow, Deep Learning (CNN)

Frontend Web Developer | Solvnex System, Petroliam Nasional Berhad (PETRONAS) **Jan 2022 - Feb 2022**

- Successfully integrated the system using Vue.js, ensuringa well-structured and maintainable codebase. Utilized Quasar Framework and Tailwind CSS to enhance UI/UX consistency and responsiveness.
- Collaborated with a team of developers to complete the system, focusing on seamless integration and optimal functionality.
- Tech Stack: Vue.js, TailwindCSS, Quasar Framework

Frontend Web Developer | Aramco OfficialWebsite, Aramco Sdn. Bhd. **Nov 2021 - Dec 2021**

- Successfully delivered the project by converting client-provided designs into interactive and responsive web pages using pure HTML, CSS, and JavaScript.
- Implemented a grid system and Tailwind-inspired utility classes for better layout structuring and responsiveness.
- Collaborated with other developers to ensure seamlessintegration of designsand functionality.
- Tech Stack: HTML, CSS, JavaScript

Frontend Web Developer| Kreno System, Krenovator Technology Sdn Bhd **Aug 2021 - Sep 2021**

- Developed and implemented new features and functionalities, enhancing system performance and user experience.
- Integrated APIs using Axios for seamless data fetching and backend communication. Collaborated with a team of developers to ensure smooth system completion and functionality. Tech Stack: Vue.js, Quasar Framework, Axios

Certification

AWS Certified Solution Architect - Associate **2024**
Amazon Web Services(AWS) 2024
